EXPERIENCE

BNP Paribas, Chennai – Security Analyst, APAC SMC

MAR 2025 - PRESENT

- Monitor, triage, and analyze security alerts and incidents using TheHive SOAR platform, ensuring rapid detection and response in alignment with security operations center (SOC) playbooks.
- Conduct in-depth log analysis across multiple data sources (SIEM, endpoint, firewall, and network logs) to support investigations and provide actionable insights to internal security and incident response teams.
- Serve as a key point of contact for the cybersecurity hotline, handling real-time escalations and providing technical guidance and solutions to business stakeholders and requesters.
- Collaborate cross-functionally with other security teams to gather evidence, support incident investigations, and contribute to post-incident reports and continuous improvement efforts.
- Prepare detailed analysis reports and documentation for internal stakeholders, ensuring compliance with organizational policies and regulatory requirements.

Zalaris, Chennai — Cyber Security Analyst

JULY 2022 - MAR 2025

- Conducted SIEM activities utilizing **Splunk** to detect and analyze security incidents.
- Within the **Security Operations Center (SOC)**, attentively monitored **24/7** and analyzed security alerts, dashboards and incidents instigated by external threat actors by maintaining SLA.
- Created more than **20 custom correlation searches** to enhance the security.
- Conducted penetration testing for 3 web applications on a regular basis using automated solution Performed **Grey box application security testing** for web applications using OWASP WSTG.
